e-STUDIO™ 2555c/3055c/3555c/4555c/5055c

There's more to Toshiba Colour than ever before.

Now you can copy, print, scan and fax with an MFP that's smaller, quieter, sleeker and faster than ever. The new e-STUDIO5055c series from Toshiba is designed to replace black and white printing with affordable full colour, while still offering high quality black and white.

Colour options to match your needs.

For all those times you want to print in colour but settle for black and white, there's the e-STUDIO5055c series. It's designed to make colour more efficient and accessible. Whether you want to spruce up a presentation with colour produced at a remarkable 25/30/35/45/50 pages per minute or print crisp, clear black and white, you'll be impressed with all that the e-STUDIO5055c series has to offer. Unique features like the e-BRIDGE Universal Print Driver, the only driver needed for multiple users, allowing you to switch between PS and PCL. It includes plug-ins so you can add features.

More compact with more impact.

Even though it's chock-full of extraordinary features, the e-STUDIO5055c series has one of the smallest footprints of any MFP in its class. So, it can be used wherever space is limited. It's lighter too, which makes it easier to ship and move around the office. Even the noise level has been reduced with a quieter drive motor, fan motor and clutch. Best of all, none of these efficiencies affect the output. In fact, image quality is incredible thanks to a new low temperature colour toner that increases the colour gamut.

Your data has never been more secure.

Toshiba knows that security is a high priority for businesses today. That's why we've put leading innovation to work and developed security measures that are unsurpassed.

Wipe Technology – it's like the data was never there.

It makes perfect sense. The best way to keep your data secure is to use a method no one else has replicated. That's just what we've done at Toshiba with our proprietary Wipe Technology. The e-STUDIO5055c series offers Toshiba's proprietary Self-Encrypting Drive equipped with our Wipe Technology as well as a suite of impressive security functions to keep data protected. If the HDD is taken from the MFP and installed into another device, all of the data is automatically erased. However, if it's taken out and then returned to the same MFP, the data is not erased and can be accessed immediately as needed. There is also an encryption key that's securely stored on the HDD.

Security taken to the next level.

Additional security features include a secure PDF encryption feature with up to 128-bit AES, IP/MAC address filtering, Role Based Access Control, an SNMPv3 protocol for enhanced security administration and an optional IPSec protocol, to name a few. In all, the features permit a security mode that complies with the extremely high security level–IEEE2600.1.

secureMFP™

Benefits include a 3,200-sheet capacity (including an optional 2,000-sheet LCF), direct USB printing, and tilting display.

Manage, capture and deliver documents with simple, one-touch control, using the large 9" colour control panel.

Environmentally friendly as well as user friendly.

At Toshiba, we work hard to make certain our products minimize environmental impact. Many of our leading innovations include new ways to save energy and save the environment.

Saving energy and saving you money.

An added benefit to our new energy-saving technologies is that they save you money too. Take, for instance, our new low temperature fusing toner. Colour reproduction is improved while energy consumption is reduced. Energy consumption is reduced even further, thanks to a dramatic reduction in the power usage during sleep mode. Other ways in which Toshiba puts environmental responsibility into action include a recycling program, reduction of CO_2 emissions and the recycling of plastics. Reduction or elimination of hazardous materials such as lead and mercury enable the series to comply with environmental standards around the world. Everything together qualifies the series for Energy Star Tier 2 certification.

Print professional-looking, full-colour newsletters and brochures using an optional saddle-stitch or staple finisher.

Doing more for our planet.

From an impressive lower power consumption of 1.5 W in sleep mode to greener manufacturing, Toshiba is a recognized environmental leader. At Toshiba we're investing in programs that help both our business and yours to better reduce, reuse and recycle.

A new standard has officially been set.

Multiple functions, innumerable benefits and millions of colours have never been made more accessible. The e-STUDIO5055c series is easily integrated, customizable and solutions ready with an open platform. You'll also appreciate cloud, mobile printing and scanning along with a host of other benefits.

Easy integration
Includes flexible customization, new EFMS device management and system software upgrades by patch, cloning and F/W updates.

Open platform
Take advantage of flexible integration into solution applications, output management interface and an embedded Web browser that can be registered in templates.

Cloud, internet and mobile printing/scanning
Enjoy mobile convenience with e-BRIDGE support for new cloud computing and mobile applications as well as Internet browsing or printing from the Internet.

Universal print driver
One driver works for all users, tandem print comes standard and additional optional plug-ins can be put directly into the driver.

Impressive image quality
Low temperature colour toner increases range of colours. Other benefits include high gloss output, and easy to use colour adjustment tools.
AquaAce specialty paper support
Achieve brilliant Colour that's water, weather and fade resistant. It's like laminated paper without the lamination. Available in ledger and letter sizes. Banner printing can be done using paper up to 12" x 47".

Compact and lightweight
It has one of the smallest footprints of any comparable MFP. It's 37% lighter than before and substantially quieter.

Low power consumption
New energy saving technologies have been incorporated, resulting in reduced power consumption.

Improved serviceability
The replacement of process units is easier and can be performed without a screwdriver. Automatic detection and initialization of a new unit has been added.

High security
A unique Self Encrypting Drive (SED) includes Toshiba's proprietary Wipe Technology along with a suite of security functions that create an unequalled level of data protection.
